Re: **Construction Notice**
Navarre Avenue Safety Improvements
LUC-SR-2-21.24, PID 96295

Dear Property Owner / Occupant,

This letter is to inform you that construction to implement various safety and aesthetic improvements along Navarre Avenue between I-280 and Isaac Streets Drive will begin in March 2017. The City has received grant funding from the Federal Highway Administration through the Ohio Department of Transportation (ODOT) for the project to reduce crashes and improve safety along this section of Navarre Avenue.

The project will include the construction of a median along Navarre Avenue with bulb outs and median openings to accommodate U-turns and emergency access. The project will include a dedicated public access road between Wheeling Street and Navarre Avenue, located northeast of the intersection, with right-in/right-out access to Navarre Avenue (SR 2) to serve businesses and provide emergency vehicle access accordingly. The project will also involve upgrading traffic signals, the addition of a second left turn lane for southbound Wheeling Street, resurfacing to improve pavement skid resistance, waterline replacement and other related work.

The contractor for the Navarre Avenue Safety Improvement Project is Geddis Paving & Excavating, Inc., 1019 Wamba Avenue, Toledo, OH 43607. Work on the project is expected to be completed by the end of November 2017.

All work will be within the existing public right of ways along Navarre Avenue and Wheeling Street. Access to driveways will be available at all times except while the construction operation is in front of the drive. Due to the nature of this project some lane closures will be necessary. Lane closure notices will be issued in advance of the closures. Project representatives will also contact any affected stakeholders directly regarding access restrictions to properties if affected. Emergency access to properties will be available at all times.

Prior to the roadway construction, utility contractors will begin working within the city's right-of-way along Navarre Avenue and Wheeling Street to install conduits to bury existing overhead utilities that cross the roadway. This work will begin in early February 2017.

The City of Oregon has hired DLZ Ohio, Inc. to provide a full time project representative/inspector on the job. The project representative will be available on site to address any concerns you may have during construction. For all concerns, questions or problems regarding the construction operation, the following are the project construction contact numbers:

City of Oregon Department of Public Service (419) 698-7047
Oregon Police Dispatch (any after-hours non-emergency matters) (419) 698-7064

For any questions or concerns regarding the overall project, please contact the Department of Public Service at (419) 698-7047. Construction plans and specifications for the project are available for review at the City of Oregon Municipal Complex at the Department of Public Service Office.

We appreciate your patience and understanding and will make every effort to minimize the inconvenience or disruption this project may have on you. If you have any further concerns or questions regarding this information please call the City of Oregon Department of Public Service at (419) 698-7047.

Sincerely,

Paul Roman, P.E.
Director of Public Service
